

SVEVA MAZZARI

Junior Full-Stack Developer

Berlin, Germany | +39 339 3220 020 | svevamazzari@gmail.com | [linkedin/in/sveva-mazzari](https://www.linkedin.com/in/sveva-mazzari) | github.com/svevotti

PROFESSIONAL SUMMARY

Self-directed developer with 3+ years of programming experience and background as a competitive athlete. Adaptable developer with experience in full-stack web development, WordPress site management, and systems-level programming. Seeking a backend, frontend, or full-stack role to contribute production code while continuously growing technical expertise.

EXPERIENCE

Web Administrator, Volunteer — Sportverein Zehlendorfer Wespen 1911 e.V.

04.2026 | Berlin, Germany

- Managed WordPress multisite migration using Duplicator Pro; diagnosed and debugged site configuration issues
- Troubleshoot and fixed critical SportsPress Pro plugin calculation error affecting tournament table results
- Configured hosting infrastructure, DNS/subdomains, and SSL certificates on Strato platform
- Updated website content, optimized image assets (sizing, format conversion), and managed plugins
- Self-directed learning of WordPress architecture, plugin ecosystem, and best practices

Marketing & Customer Care Specialist — StAR International

03.2021 – 12.2023 | Italy

- Managed end-to-end college application process for student-athlete clients: application preparation, documentation, visa assistance, through arrival and enrollment
- Created and maintained social media presence
- Translated documents between Italian and English (educational records, correspondence, visa applications)

PROJECTS AT 42 BERLIN

Transcendence — Full-stack single-page pong game platform with multiplayer, user authentication, and game history. Built all front-end pages in HTML, added dynamic interactivity with TypeScript, and styles with Tailwind CSS.

Webserv — HTTP multi-client server implementation with CGI support: create sockets, request parsing, response handling, and configuration file reading (C++)

Cub3D — 3D first-person maze renderer using ray casting algorithms (C)

Inception — Multi-service containerized infrastructure using Docker Compose and custom Docker images, with volumes for data persistence.

EDUCATION

Core Curriculum — 42 Berlin (2022–2025)

Immersive project-based programming education covering C, C++, data structures, network architecture, and soft skills.

Bachelor of Science — University of Houston (2016–2018) - Tennis Scholarship

Liberal Studies: Anthropology, Mathematics, and Spanish

Coursework — Emory & Henry College (2015–2016)

TECHNICAL SKILLS

Languages: C, C++, Assembly, Python, JavaScript, TypeScript

Frontend & Web: WordPress, HTML, CSS, Tailwind CSS

DevOps & Tools: Docker, Virtual Machines, Git, Linux

LANGUAGES

Italian (Native) • English (C1) • Spanish (B2) • French (B2) • German (A1) • Latin & Ancient Greek (Reading/Translation)

INTERESTS

Learning Kotlin and developing my first Android app. Active German language learner. Passionate about continuous learning and taking on new challenges—the same discipline from my athletic background fuels my technical approach. Semi-professional tennis player (II Bundesliga Nord, Zehlendorfer Wespen)
